Contents Volume 200 (1998)

ROOT DEMOGRAPHICS AND THEIR EFFICIENCIES IN SUSTAINABLE AGRICULTURE, GRASSLANDS, AND FOREST ECOSYSTEMS

Selected Papers from the 5th Symposium of the International Society of Root Research, July 14–18, Clemson, South Carolina, USA

Guest editor: J.E. Box, Jr.
International Society of Root Research, United States Department of Agriculture, Agricultural Research Service, Watkinsville, Georgia, USA

Preface
J.E. Box, Jr. 1

Influence of CO_2 enrichment and nitrogen fertilization on tissue chemistry and carbon allocation in longleaf pine seedlings
J.A. Entry, G.B. Runion, S.A. Prior, R.J. Mitchell and H.H. Rogers 3–11

Nutrient composition of Douglas-fir rhizosphere and bulk soil solutions
X. Wang and D. Zabowski 13–20

Seasonal development of loblolly pine lateral roots in response to stand density and fertilization
M.A. Sword 21–25

Production of carbon disulfide (CS_2) from L-djenkolic acid in the roots of *Mimosa pudica* L.
J. Piluk, P.G. Hartel and B.L. Haines 27–32

Eastern gamagrass (*Tripsacum dactyloides*) root penetration into and chemical properties of claypan soils
R.B. Clark, E.E. Alberts, R.W. Zobel, T.R. Sinclair, M.S. Miller, W.D. Kemper and C.D. Foy 33–45

Impact of roots on ground water quality
T.J. Gish, D. Gimenez and W.J. Rawls 47–54

Root growth responses to lead in young maize seedlings
N.V. Obroucheva, E.I. Bystrova, V.B. Ivanov, O.V. Antipova and I.V. Seregin 55–61

Genetic control of adaptive root characteristics in white clover
J.R. Caradus and D.R. Woodfield 63–69

Analysis of some direct and indirect methods for estimating root biomass and production of forests at an ecosystem level
K.A. Vogt, D.J. Vogt and J. Bloomfield 71–89

Automated image analyses for separating plant roots from soil debris elutrated from soil cores
R.H. Dowdy, A.J.M. Smucker, M.S. Dolan and J.C. Ferguson **91–94**

Fibrous carrot root responses to irrigation and compaction of sandy and organic soils
L. Pietola and A.J.M. Smucker **95–105**

Portable rhizotron and color scanner system for monitoring root development
W.L. Pan, R.P. Bolton, E.J. Lundquist and L.K. Hiller **107–112**

Soil temperature effects from minirhizotron lighting systems
K.C.J. Van Rees **113–118**

REGULAR PAPERS

Phytotoxicity of the fluoride ion and its uptake from solution culture by *Avena sativa* and *Lycopersicon esculentum*
D.P. Stevens, M.J. McLaughlin and A.M. Alston **119–129**

Interactions between *Glomus mosseae* and arbuscular mycorrhizal sporocarp-associated saprophytic fungi
S. Fracchia, M.T. Mujica, I. García-Romera, J.M. García-Garrido, J. Martín, J.A. Ocampo and A. Godeas **131–137**

Fe chelates from compost microorganisms improve Fe nutrition of soybean and oat
L. Chen, W.A. Dick, J.G. Streeter and H.A.J. Hoitink **139–147**

Nitrogen-15 labeling effectiveness of two tropical legumes
K.M. Glasener, M.G. Wagger, C.T. MacKown and R.J. Volk **149–156**

Geometrical properties of simulated maize root systems: consequences for length density and intersection density
P. Grabarnik, L. Pagès and A.G. Bengough **157–167**

Relationship between ammonium accumulation and senescence of detached rice leaves caused by excess copper
L.-M. Chen and C.H. Kao **169–173**

Phytotoxicity of hydrogen fluoride and fluoroborate and their uptake from solution culture by *Lycopersicon esculentum* and *Avena sativa*
D.P. Stevens, M.J. McLaughlin and A.M. Alston **175–184**

Additional studies of the nodulation status of legume species in Brazil
S.M. de Faria and H.C. de Lima **185–192**

Soil nitrogen dynamics and plant-induced soil changes under plantations and primary forest in lowland Amazonia, Brazil
C.K. Smith, H.L. Gholz and F. de Assis Oliveira **193–204**

Plant growth promoting rhizobacteria accelerate nodulation and increase nitrogen fixation activity by field grown soybean [*Glycine max* (L.) Merr.] under short season conditions
N. Dashti, F. Zhang, R. Hynes and D.L. Smith **205–213**

Relationship between availability indices and plant uptake of nitrogen and phosphorus from organic products
G.L. Velthof, M.L. van Beusichem, W.M.F. Raijmakers and B.H. Janssen **215–226**

Plant leaf area expansion and assimilate production in wheat (*Triticum aestivum* L.) growing under low phosphorus conditions
D. Rodríguez, W.G. Keltjens and J. Goudriaan **227–240**

Cadmium toxicity effects on growth, mineral and chlorophyll contents, and activities of stress related enzymes in young maize plants (*Zea mays* L.)
A. Lagriffoul, B. Mocquot, M. Mench and J. Vangronsveld **241–250**

The role of different arbuscular mycorrhizal fungi in the growth of *Calamagrostis villosa* and *Deschampsia flexuosa*, in experiments with simulated acid rain
M. Vosatka and J.C. Dodd **251–263**

Loss of nitrogen in compacted grassland soil by simultaneous nitrification and denitrification
M.K. Abbasi and W.A. Adams **265–277**

Volume contents **279–281**

Author index **282**

Instructions to authors **283–285**
